

NO. TOUCH.
FROI. SROI.

PCIS' most innovative compliance solution ever, now offered STANDALONE

A solution so...

Intelligent, you never have to think when to
submit a FROI or SROI

Powerful, all submissions are pre-validated
before hitting the state

Simple, alerts let you know
acknowledgements, data needing
correction

*"PCIS' No Touch FROI SROI
is amazing, it is the best
compliance solution we
have ever seen."*

*Johanna Grasso,
Claims Manager
AMLJIA*

No Touch FROI SROI Reporting

Automated Compliance Taken to New Heights

37 States
Release 1, 2, 3, & 3.1

Claims & RMIS System
Integration

Auto-triggers: MTC Coding,
Sequencing, Stacking

Autotriggers Know what a Claim's Activation Points are per State

- Work a claim normally, let the auto triggers and logic do the work
- Activation points trigger when a SROI is required, fields are swept and sent automatically
- Based on 800 data points, 50 MTC codes and more

Single File Format

- 1 format to PCIS for all 3 standards across all 37 states
- Extract: PCIS works with you to define, map, and populate the file once
- Transform: PCIS' No Touch FROI SROI solutions transforms with smart business rules engine claims data into FROI/SROI reports assigning MTC codes and built in logic (per state)
- Load: sequencing, and stacking and transmission to the state

Validation & Assurance = No Fee Guarantee

- Pre-validation occurs with data before it hits the state
- Data issues are presented to user via a friendly alert and diary for correction
- Acknowledgements are also delivered on user's dashboard as well as available in reports

FROI SROI Dashboard & Reporting Platform

- Receive all communications regarding FROI/SROI reporting in centralized hub
- Error, Timeliness, Accuracy, Acceptance Reports out of box and distributable (incl. email subscriptions)
- MTC error reports allow entity to identify trends and pinpoint reoccurring data issues
